Karagoz In Turkey a
mischievous character It
worked by having a
coloured shadow
puppet made from
camel hide moving
behind a screen made
out of muslin with a
candle illuminating the
scene from the back

The 'kaleidoscope' was invented by Sir David Brewster, a tube using two mirrors to reflect multiple images of coloured glass pieces. It proved to be one of the most popular optical toys ever created. 1817

The Thaumatrope [pronounced taw-motrope] was invented.

optical toy the zoetrope consists of a cylinder with vertical slits cut into the sides and a strip of pictures or animation placed inside. When the cylinder is spun, the slits create the illusion of motion, making the pictures appear as if they are moving.

The school was
established to provide
technical education to
skilled workers, and was
one of the first
institutions of its kind in
the country, offered
courses in engineering,
mathematics, and
science in the industry.

The first Superman
comic book was
released in 1938, and
featured the character's
initial appearance in the
Action Comics #1 issue.
